The activated carbon foam can be used as the material of pleated carbon filter and activated carbon filter panels for more applications. Activated carbon foam has different pore size. Inquiry for Our Product Purair Carbon Filter Company E-mail: purair@carbon-filter.com When you contact us, please provide your detail requirements. Foam thickness: 3mm - 25mm. Carbon content: minimum 50%. The different pore sizes can suit more applications and satisfy more customers. High quality activated carbon material. Activated carbon foam, also known as activated carbon sponge, is a kind of air filter media. The activated carbon foam is mainly used for eliminating volatile organic compounds, dust, fog, odor and formaldehyde, etc. Approx. The perfect package can protect activated carbon foam from moisture. This ensures optimum air distribution and therefore maximum utilization of the carbon material along with minimum energy consumption. Specification Base material: polyurethane sponge. It can protect the activated carbon foam from moisture. Perfect package. The activated carbon foam is commonly supplied in sheet, the maximum width is 1m and the maximum length is 2m, the special specifications can be customized. The activated carbon foam can be made into activated carbon filter panel. The activated carbon foam has different pore sizes, which have different air filtering efficiency. Application The activated carbon foam with high carbon content and high filtering efficiency is mainly used for eliminating and removing the peculiar odors in the air. PORETÁ@Á Carbon filter foam is impregnated with highly active carbon. Features Different pore sizes.
